PROJECTS

Expense Tracker App
- Created an app to promote financial awareness amidst rising commodity prices.
- Implemented comprehensive CRUD functionality for income and expense management.
- Employed MongoDB for the backend.
- Utilized `react-chartjs-2` to visually represent data with pie charts.
- Engineered a dynamic budget tracking component, displaying remaining category budgets as progress bars.

Mini Restaurant app
- Developed a back-end framework using Express JS.
- Leveraged a JSON database for seamless addition, editing, and deletion of menu/cart items.

To-do App
- Crafted a classic to-do app with a charming retro-gaming theme using ReactJS.

Calculator
- Engineered a feature-rich calculator with DOM manipulations, event handling, and polished CSS interface.

Etch-a-Sketch
- Implemented intricate drawing functionality, expertly handling diverse user events and responsive DOM element interactions.

Rock, Paper, Scissors
- Devised compelling game logic, intricately weaving together various functions for smooth gameplay, including score tracking and choice generation.

Memory Game
- Designed and developed an engaging mini-game using vanilla JavaScript, showcasing adept DOM manipulation and skillful use of async functions.

Landing Page
- Showcased creativity through a captivating landing page template, skillfully crafted using pure HTML and CSS.

EDUCATION

Uplift Code Camp   **November,2022**
Full Stack Web Development Program, MERN stack   *Manila, NCR*

Saint Louis University   **May, 2022**
Bachelor of Science, Electronics and Communications Engineering *Baguio City, Benguet*
